Subscribing to TrailBlazer's J4 MAC implementation listserv is one of the most effective and timely methods of receiving important J4 MAC implementation information. **Providers should subscribe and CONFIRM their subscription to the J4 MAC Implementation News listserv as well as any state-specific listserv mailing lists for their service area(s).** Jurisdiction-wide information will be shared in the J4 MAC Implementation News listserv as often as is needed, with state-specific information included in the state-specific listservs. The subscriber's information is kept confidential and is only used by TrailBlazer to send e-mail messages regarding important J4 MAC implementation updates and changes. The listserv messages are delivered in a secure environment directly to the subscriber's e-mail box.

Subscribing

Subscribing to TrailBlazer's J4 MAC Implementation News and state-specific listserv mailing lists is easy and free. To access the Listserv page, select [LISTSERVS](#) at the top of any J4 Web page or click the listserv name displayed in the "J4 Listservs" section in the upper right corner of the J4 page. On the J4 Listserv page, check the box next to the selected mailing list(s). The provider will be asked to verify or enter his e-mail address and select "Subscribe." If the subscription request is successful, an e-mail notice will be sent confirming the subscription change. The provider must respond to this message to have the subscription change fully activated. This is to prevent unauthorized individuals from signing someone up without their permission.

Note: If an e-mail confirmation notice is not received, the subscription request has not been successful and the provider must again follow the above process. In addition, due to increased Internet security, providers should check their spam or bulk e-mail folder to ensure the confirmation e-mail message was not delivered to that location instead of to their e-mail inbox. If this has occurred, select the confirmation message and mark it "Not Spam," which should allow future messages to be delivered.

Listserv Mailing Lists

Following is a listing of J4 MAC Implementation listserv mailing lists:

- **J4-MAC Implementation News** – Notification of important J4 implementation information. Providers should subscribe to this mailing list in addition to any state-specific mailing lists to ensure timely notification of important J4 MAC implementation updates.
